RANUNCULUS

"Bonnie Lassie"

Pink flowers are always in large demand, and we have now a strain which is admirably suited for this requirement. It is a strain comprising of mostly rose-pink shades, going on to light pinks. For indoor decoration it is superb, the flowers will last for a considerable time.

When planting Ranunculus "Bonnie Lassie" we would recommend the selection of a bed protected from the worst of the hot winds in summer as the flowers are more readily finished by any adverse weather conditions. This strain is a distinct selection of all the most wanted pink shadings and is undoubtedly one of the finest for indoor decoration.

"Golden Glory"

Bright yellow flowers always strike a distinct note in any decorative scheme. Ranunculus "Golden Glory" is a strain comprised of mostly bright yellow shades with an intermingling of flaked varieties. The demand for this attractive strain has increased rapidly since its introduction several years ago. This popularity is due to the vigorous habit of growth and large size of the blooms which are fully exhibition size. Plant this strain for a brilliant garden display.

"Huntsman"

A brilliant mixture of mostly bright red shades. We have greatly re-selected this variety and are more than satisfied that it will meet with a large demand from flower lovers. The robust plants yield a profusion of first class blooms for a considerable time, making a brilliant garden display. An excellent cut flower rivalling many other flowers for indoor purposes.

"Sunset"

Aptly named because of its beautiful shadings. Few indoor color schemes are designed without the inclusion of the rich autumn tonings.

Ranunculus "Sunset" is admirably suited for this purpose, the rich colorings range from terra-cotta, brick-red, apricot down to soft fawns of a distinct autumn tone. This strain will last far longer in bloom than other varieties as it is not so easily affected by the adverse weather conditions. Robust in growth, producing large flowers borne on long stems make it a decided acquisition for decorative purposes.

We have every confidence in recommending this strain to you for any purpose whatsoever. As a garden display Ranunculus "Sunset" ranks among the first.

NEW RANUNCULUS

"Claremont" Super Hybrids No. 9

SPLENDID NEW GIANT DOUBLE FLOWERING STRAIN.

Comparative tests which we have conducted during the past few years have shown the "Claremont" Hybrids to be very definitely THE FINEST STRAIN EVER INTRODUCED.

No other plants in commerce can produce such a riot of color as this remarkable "Claremont" Ranunculus.

It is INDISPENSIBLE FOR EXHIBITION and is undoubtedly the largest flowered variety in cultivation, huge flowers four to five inches across being produced in such profusion that the plants are literally hidden. The color range, which is the most varied we have yet offered, embraces pure white, pinks and yellows in all shades, brilliant scarlets, vivid apricots, and a full range of all shades incidental to these colors.

Notwithstanding immense size, the flowers are in no way coarse and the general quality is superb. Exceptionally heavy crops of flowers are obtained and for either exhibition purposes or garden decoration THE STRAIN STANDS WITHOUT A PEER.

"Claremont" Super Hybrids No. 5

(Award of Merit, Nurserymen & Seedmen's Association of Victoria.)

The Committee of Inspection, which recommended the granting of this Certificate of Merit, stated: "We consider the new strain of Ranunculus, known as the "Claremont" Super-hybrids, to be the best we have yet seen for constitution of plant, harmony of color, form and size. All inferior quality and poor coloring have been carefully eliminated."

The "Claremont" Ranunculus Super-hybrids No. 5 are the best obtainable in the World. No other strains have been introduced that are equal in quality to these magnificent hybrids. The mixture of color embraces all shades of cream, yellow, orange, tango, scarlet, crimson, and the beautiful flaked varieties are also prominent.

The robustness of constitution and long flowering qualities place this strain in the highest possible position and it is recognised as the leading strain of Ranunculus.

Many other strains of Ranunculus on the market to-day have had the "Claremont" Ranunculus Super-hybrids introduced into them. This can be seen and is proved beyond all doubt as a large percentage of the blooms are distinct No. 5 type.
